

## FOLLOW OUR BUCKSWOOD LIONS LIVE - LIVE STREAMING OF FOOTBALL MATCHES, PRODUCTION OF PLAYER HIGHLIGHTS AND MORE...

We are please to announce the latest signing for the 2020-2021 season, our Veo football tracking camera. The Veo camera is a brand new football tracking camera that uses artificial intelligence to pan and zoom smoothly to follow the ball around the field giving us a fantastic view of the game.

# veo

At Buckswood we film as many of our games and training sessions as we possibly can with players getting sent links to the videos to review before their next session or game, this massively helps with their development, visual learning really works. They love to see themselves and also take great interest in their individual and team performance. Coaches also love the ability to highlight good areas and the opportunity to go over some areas that might need more work or focus.

Players are encouraged to create highlights videos of themselves to send out to Football clubs, coaches, scouts, universities etc. and we have already had one player sign for a professional club in Spain after creating his highlights video, going on a trial and then eventually signing a contract with them.
