

Buckswood School Key Stage 3

Key Stage three consists of the students in our Junior School. Forms 1-3. We are a small cohort which means staff know the students' strengths and needs incredibly well.

At Key Stage 3, our students study the following courses: English/ESOL, Science, Mathematics, Geography, History, French, Spanish, Chinese, Physical Education, Computer Science and Art.

All students also have the opportunity to take part in the 'Buckswood Super Curriculum', which is an optional extra project-based initiative focussing on academic excellence, allowing students the chance to deepen their knowledge in all of their subjects, via a series of tasks and activities.

The Buckswood Certificate also provides students with a chance to study the 'big questions' and present their findings on a range of cross-curricular topics such as 'the use of AI' and 'why people migrate'.
