

BUCKSWOOD SCHOOL PE & GAMES DEPARTMENT

What we offer

The PE (Physical Education) and Games department offers students an opportunity to explore a variety of different sporting experiences. Physical education isn't just about sports though... You will be able to learn a lot about health, well-being and the human body as a whole. PE is a great topic for any budding sportsperson, who wishes to understand the demands physical activity places on the body and wider issues in the sports industry. However, it is also a great pathway into other careers in sport/physical activity (e.g. coaches, teachers, physiotherapists, personal trainers and dieticians).

We promote the concept of sporting excellence through specialist sporting academies staffed by highly qualified coaches. There is a sport for everyone and we encourage children to explore and find talent in different sports.

Our Courses

Students wishing to study Physical Education have the opportunity to do so at both GCSE and A-Level. We offer two-year courses at both age groups, each of which have a practical coursework element as well as the theoretical side of learning.

Successful University Placements

In recent years, pupils have gone on to further their studies in PE at university, with pupils now studying PE, Sport and Youth Development at St Mary's University (Twickenham) and Sport Management at University of Derby.
