🪴 Pillar 10: Ecology & Sustainability

Real-world learning through action and care for our planet.

At Buckswood, we believe that real education happens when students roll up their sleeves and take part in meaningful action. **Under Pillar 10 – Ecology & Sustainability,** our students learn to care for the planet through hands-on experiences that make a difference. During our recent trip to Thailand, Buckswood students joined a vital mangrove restoration project, planting trees to protect coastlines, support biodiversity, and capture carbon from the atmosphere. This wasn't just a lesson - it was real-world learning in action, connecting global ecological challenges to personal responsibility. **At Buckswood, we don't just talk about sustainability; we live it** through our 12 Pillar philosophy.
